APPLICATION AS DEVOPS ENGINEER

Hi,

Are you looking for a competent, motivated DevOps Engineer with experience in the Kubernetes, maintaining and automation cloud-based production environment? Are you looking for an employee who will lead automation team? Then my application is sure to be of interest to you.

Through my study at the Electrotechnical University ETU "LETI", I gained experience to understand complex tasks independently. Through my work at GS Labs Inc as Operation engineer, I gained experience with services monitoring and operation. By growing to DevOps and Senior DevOps role, i've opened for myself world of automation, clouds and importance of it. My current position (DevOps Tech/Team Lead) in Infobip LLC helped me to make step forward and gain very relevant experience with HA and HL systems in close communication between multiple tams.

I would like to bring my personal skills and experience to your company. My salary expectations are € 75,000 a year and I am available to you after few months of relocation to bring value.

I am looking forward to a personal interview.

With best regards
Denis Lavrushko

CURRICULUM VITAE

PERSONAL INFORMATION

👤	Name	Denis Lavrushko
📅	Date of birth	02.10.1988 Kazakhstan
📍	Adress	Dobrovoltsev 58 198334 St-Petersburg Russia
